Inhaltsverzeichnis

Session 1: Accelerators

Modeling and Mapping of Regular Nested Loops on Processor Arrays: CGRAs vs. TCPAs 1
Dominik Walter, Marita Halm, Daniel Seidel, Indrayudh Ghosh, Christian Heidorn, Frank Hannig, Jürgen Teich, Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU), Erlangen, Germany

GPCC: Grid of Processing Cells Compiler with Pareto-Optimal Design Space Exploration 13
Yutong Wang, Yanda Li, Rainer Dömer, Center for Embedded and Cyber-Physical Systems, University of California, Irvine, CA, USA

Transparent integration of FPGA hardware accelerators into IEC 61499 applications 22
Mahsa Moazez, Verena Klös, Jörg Walter; Carl von Ossietzky Universität Oldenburg, Germany; OFFIS – Institut für Informatik, Oldenburg, Germany

Session 2: AI and Data-Driven Approaches

AI-based abstraction of test programs 32
Matthias Sauppe, Matthias Werner, Ulrich Heinkel; Chemnitz University of Technology; Advantest Europe GmbH

A Formal Description of Communication Protocols Using Petri-Nets..... 41
Jan Ole Ernst, Dmitri Saberi, Thomas Zimmermann, Derek Christ, Philippe Barbie, Matthias Jung; Normal Computing; Fraunhofer IESE; University of Würzburg

Data-Driven Identification of Hybrid Systems using Genetic Programming..... 44
Maximilian Schmidt, Swantje Plambeck, Jannes Wegner, Goerschwin Fey, Hamburg University of Technology

Session 3: Simulation

Accelerating Accurate Memory Subsystem Simulation Using Dynamic Binary Instrumentation For Online Trace Generation 48
Derek Christ, Lukas Steiner, Nils Wilbert, Matthias Jung, Norbert Wehn; University of Würzburg,Germany; RPTU Kaiserslautern-Landau, Germany

A Simulation-Based Analysis of Execution Time Distributions and Cache Performance 57
Andre Gaschler, Iwan Feras Fattohi, Frank Slomka, Ulm University, Institute of Embedded Systems/ Real-Time Systems, Ulm, Germany

Using Virtual Prototypes for Causal Fault Explanation at System Level 69
Caroline Dominik, Rolf Drechsler; Institute of Computer Science, University of Bremen, Germany; Cyber-Physical Systems, DFKI GmbH, Bremen, Germany

Session 4: RISC-V

TETRISC on Rocket Chip: A Scalable and Adaptive RISC-V Multicore Architecture 76
Kai Arne Hannemann, Lars Luchterhandt, Wolfgang Müller, J. Ch. Scheytt, Markus Ulbricht, Li Lu; Paderborn University, Paderborn, Germany; IHP – Leibniz Institute for High Performance Microelectronics, Frankfurt (Oder), Germany

Truly Scalable Grids of RISC-V Processors with Local Memories 83
Lars Luchterhandt, Vivek Govindasamy, Yutong Wang, Rainer Dömer, Wolfgang Mueller, Christoph Scheytt; Heinz Nixdorf Institute, Paderborn University, Paderborn, Germany; Center for Embedded and Cyber-Physical Systems, University of California, Irvine, CA, USA

FastISS-Enhanced RISC-V VP++:
Latest Results in High-Performance Interpreter-Based Simulation 92
Manfred Schlägl, Daniel Große, Institute for Complex Systems, Johannes Kepler University, Linz, Austria

Instruction Set Simulator based exploration of RISC-V Hardware Acceleration
for HQC Post-Quantum Cryptography Algorithm..... 96
Bo Zhou, Eyck-Alexander Jentzsch, Christian Appold, Tim Leinmüller; DENSO AUTOMOTIVE Deutschland GmbH, Eching, Germany; MINRES Technologies GmbH, Neubiberg, Germany

Session 5: Modeling and Benchmarking

To Count or Not to Count: On the Usage of Performance Counter Metrics
for Host to Embedded GPU Performance Estimation..... 100
Alexander Louis-Ferdinand Jung, Moritz Reiber, Jannik Steinmetz, Konstantin Lübeck, Oliver Bringmann, Embedded Systems, Department of Computer Science, Eberhard Karls Universität Tübingen, Tübingen, Germany

Model-Driven Generation of Asynchronous Circuits focusing on RISC-V Processors 110
Johannes Ecker, Natalie Simson, Zishu Chai, Ares Tahiraga, Sebastian Prebeck, Jaafar Mejri, Wolfgang Ecker, Endri Kaja; Infineon Technologies AG, Germany; Technical University of Munich, Germany; Tallinn University of Technology, Estonia

Hardware Agnostic Energy Benchmarking For Machine Learning..... 122
Timo Laudi, Rolf Drechsler; Institute of Computer Science, University of Bremen, Germany; Data Science Center of the University of Bremen, Germany; Cyber-Physical Systems, DFKI GmbH, Bremen, Germany

On the Origins of Self-Explainability in Cyber-Physical Systems: Model-Based and Data-Driven Approaches..... 131
Laleh Akbari, Rolf Drechsler; Institute of Computer Science, University of Bremen, Germany; Cyber-Physical Systems, DFKI GmbH, Bremen, Germany

Session 6: Security and Verification

Integration of automated security analysis into the early
stages of model-based development for HW/SW of IoT systems..... 135
Corina Holom, Donghao Qiu, Markus Lang, Michael Peck, Thomas Besorna, Daniel Mueller-Gritschneder; XCoorp, Austria; TU Wien, Austria; Sparx Systems, Austria

SCVPI*: A Reusable PyUVM-Based Verification Framework for RTL and SystemC Models 144
Bhavay Arora, Rainer Dorsch, Christian Haubelt; Bosch Sensortec GmbH; University of Rostock

Interactive Verification Using Averest: The Basic Theorem Proving Infrastructure..... 153
Klaus Schneider, Akshay Tukaram Rao, Department of Computer Science, RPTU Kaiserslautern-Landau, Germany

Okapi: Efficiently Safeguarding Speculative Data Accesses in Sandboxed Environments 165
Philipp Schmitz, Tobias Jauch, Alex Wezel, Mohammad R. Fadiheh, Thore Tiemann, Jonah Heller, Thomas Eisenbarth, Dominik Stoffel, Wolfgang Kunz; RPTU Kaiserslautern-Landau, Germany; Stanford University, USA; University of Lübeck, Germany

Enabling Power Side-Channel Attack Simulation in Gem5..... 169
Christian Appold, Yong Hu, Ernesto Cristopher Villegas Castillo, Tim Leinmüller; DENSO AUTOMOTIVE Deutschland GmbH, Eching, Germany; Cadence Design Systems, Munich, Germany
